

MUSA YAZID

BACKEND DEVELOPER

Node.js & PHP

Location | Lagos, Nigeria
Phone | +234 7061889992
Email | musa.yazid49@gmail.com
LinkedIn: <https://www.linkedin.com/in/musa-yazid-b0b66ab5/>
Github | <https://www.github.com/yazshrilld>

CORE TECHNOLOGIES

Node.js (Express.js)	PHP (Laravel)
MySQL	MongoDB
Html/Css/Bootstrap	Javascript
Git/GitBook	Ngrok
Linux	WordPress
Joomla	Opencart

EDUCATIONAL BACKGROUND

Bachelor Of Science In Industrial Physics

University of Benin, 2016
CGPA 3.61/5.0

Final Year Project

Developed a traffic control system running on micro-controllers with C Programming and Arduino

Results-driven **Back-end Developer** proven to provide insight into **business applications**, from architecture to implementation, design to testing, **product-minded with two years of experience integrating back-end elements with front-end users** to implement and optimise server-side systems for mobile applications, websites, payment platforms. My professional background as a motivated, time-efficient and progress-focused back-end developer with a standing feet in the fin-tech industry makes me a great fit for industry progress. With a track record of **initiative and dependability**, my industry experience has additionally afforded me extra skills in various areas such as critical thinking, customer service, technical support and technical documentation.

WORK HISTORY

Back-end Developer

Vogue-pay Web Solutions | Sept 2020 - Present

Responsible for managing the integration of user-facing elements developed by front-end developers with the server-side logic. Participates in developmental opportunities, including new product development, gaining familiarity with concepts, maintenance routines, and work-flows and integrating Open banking APIs.

- Contributed to the architecture of the payment system to satisfy the requirements of various CMS plugins (WordPress & Joomla), thereby improving integration rates by 50%.
- Fosters talent development by providing coaching and mentoring to interns, encouraging the attainment of both individual and organisational goals.
- Write clean code with Solid principles for efficient functionality of micro-services (mobile to-pup).
- Troubleshoot and debug applications using X Debug and Vs code increasing productivity by 20%.
- Spearheaded the Technical documentation of the updated version of the payment system fostering easy understanding to developers integrating the system by 70%.

Technical Support Representative

Vogue-pay Web Solutions | March 2020 - August 2020

Actively running diagnostic software, updating computer programs, researching installation requirements to ensure high quality software propagation, first level res-ponder to customer inquiries on technical issues. Established open channels of communication with clients to fully understand issues, resolving and troubleshooting simple or complex issues. Provided assistance to administrative staff in their day-to-day tasks. Identified and escalated priority issues per client specifications.

- Responsible for hardware and software repairs, installations and configurations on staff computers.
- Cultivated positive and lasting relationships with clients, acquiring and retaining clients through positive and efficient customer service.
- Resolved a bug on the payment feature, improving overall approval rate by 70%.
- Provided technical support to team members, serving as a subject matter expert, providing suggestions regarding increasing technical support productivity.

QUALIFICATIONS PROFILE

Database Design Management

- Experienced in database management and process management using technologies such as MySQL, MongoDB and implementation with local servers such as Ngrok.
- Optimizes applications for maximum speed and scalability, excellent understanding of secure coding with a deep level knowledge of SQL injection and the use of sonarqube for code quality and code security.

Architecture and Design Structure

- Creative with architectural flowcharting techniques for effective application development, deployment and critical problem solution.
- Good knowledge of data structures and algorithm to identify process inefficiencies, implementing innovative initiatives to increase productivity and reduce error rate.

IT Training

- Leverages subject matter expertise to review and oversee the work of junior engineers. .
- Encourages individual knowledge and skill development by providing coaching and mentoring to others.
- Comprehensive understanding and use of Linux for file structure, stability and security of the working environment.

PROJECTS

- Personal Portfolio (<https://awesome-bhabha-93648f.netlify.app/>).
- Food Ordering System (<https://elastic-lamarr-35ba41.netlify.app/>) .
- e-Commerce System (<https://9453-197-211-58-61.ngrok.io/myCommerce>) hosted on Ngrok servers.
- QR Code generator, POSTMAN link (<https://documenter.getpostman.com/view/10429883/TzzBpay7>).
- Phone_Verification, POSTMAN link (<https://documenter.getpostman.com/view/10429883/TzzHmtKx>).

Certifications

- Secure Coding Certificate (<https://www.udemy.com/certificate/UC-2482f7e8-ac3c-48e1-82f1-018bfa66fee2/>).
- Database Management, Design & Development (<https://www.udemy.com/certificate/UC-05ff3ac0-40ea-4f9b-8d07-54f23101a43d/>) .
- SQL Injections Certification (<https://www.udemy.com/certificate/UC-0fee6efe-963c-4f8b-8c89-ed619cdf79f0/>).
